Research

University of Maryland, Research Assistant June 2023 - Present
Advised by Dr. Jun Nishida

- Exploring effective intervention methods provided by different modalities and devices (e.g., tactile, haptic, somatosensory) to investigate which sensory stimulation can be an effective method for users to avoid repetitive behavior (e.g., nail-biting)

University of Maryland, Research Assistant Sep 2021 - Jan 2023
Advised by Dr. Eun Kyoung Choe

- Conducted a survey to understand how blind and low-vision people engage in health activities, and how they collect and use their data about their health [1]
- Built an annotation app for stroke patients that is a multi-modal self-tracking application [\[demo\]](#)
- Developed an android application for tracking stroke survivors' finger individuation task [\[demo\]](#)

Ewha Womans University, Research Assistant Jan 2019 - July 2021
Advised by Dr. Uran Oh

- Participated in multiple research projects focused on accessibility for people with visual impairment and developed extended reality systems aimed at improving their daily lives [3-5]
- Conducted research on non-visual feedback in virtual reality [2, 6]
